

Dyatmika School Early Years

ENROL NOW

Foundations For Success

Dyatmika has a well-deserved reputation for being one of Bali's most desirable schools. Our Early Years section is located in the beautiful setting of the Dyatmika School campus, surrounded by rice paddies, lush vegetation and with stunning views of the ocean. Dyatmika is proud of its Balinese roots whilst being outward looking and welcoming.

Dyatmika's goal of raising children who will one day create a better world begins in the Early Years. We cater for children aged between 3 and 6 years old, providing strong foundations for success. We aim to shape students who care about the world, and who will make a difference in the years that follow at Dyatmika School or beyond.

Nurturing Environment

Our highly skilled Early Years team provides a dynamic and nurturing environment, engaging students in a play-based, bilingual curriculum. Students in the Early Years also benefit from being part of a reputable school with excellent facilities. Music, sport and art lessons are taught in a variety of purpose built, age appropriate, indoor and outdoor learning spaces.

Playgroup

Our playgroup benefits from well-resourced learning environments, enabling children to engage in purposeful play-based experiences and participate in a wide variety of adult led and child initiated activities. Activities are hands-on, language rich and developmentally appropriate for young children. Through the universal language of play, children can communicate, make friends and grow. We understand that every child is unique and that they develop at their own pace: learning new skills, acquiring new knowledge, exploring, creating and thinking critically.

Kindergarten A (TK) and Kindergarten B (Primary Prep)

Kindergarten classes are led by qualified, experienced teachers. Our talented bilingual national teachers work alongside international colleagues to provide rich learning and structured play opportunities, fostering a sense of curiosity and enjoyment. Students' increasing understanding of phonics leads to progression in their fluency of reading and writing in both English and Bahasa Indonesia. Similarly, their mathematical skills and understanding of the world continue to develop, as do their social and emotional skills.

About

Dyatmika is a not-for-profit school founded by national and international parents over twenty-five years ago. While student numbers have grown from a single class to a student body ranging from Play Group to the graduating Class 12, the school continues to have a community feel. Dyatmika is embedded within Bali and its cultural traditions, whilst remaining an interculturally welcoming place for students to learn.

Our academic and extracurricular programmes combine to offer a quality education that sees students thriving during their time at Dyatmika. They leave our school equipped to pursue further education, to follow vibrant careers and to live fully and well.

**We look forward
to welcoming you to our school**
